

562-VA V-Block Scale Holder Set

Hold scales against rolls and shafts

The **562-VA** helps you place a scale against many cylindrical drums or rolls, and hold the scale nominally on a diameter of the roll. The 562-VA set includes two scale holders: one **562-VA-120** V-block (120°), and one **562-VA-160** V-block (160°). One side of the V-block holds our 40" or 1000mm scales, and the other side holds all of our smaller scales (see photo below). Eyebolts allow the use of straps or tie-downs for extra security.

Note: The 562-VA is a set consisting of both V-blocks, but each V-block may also be purchased individually (see table below).

Model	Description	Fits
562-VA	562-VA-120 & 562-VA-160 V-block scale holders with case	2" - 48" dia. rolls (5cm - 1.2m)
